OA Journals: Subscription Products and Cambridge University Press Gold OA journals which offer the option to publish OA Articles. Corresponding Author: a current Licensee student or member of staff who handles the manuscript and correspondence during an Article’s publication process – from manuscript correction and proof reading, to the revisions and re-submission of revised manuscripts up to acceptance. Open Access/OA: a publishing model that allows content to be published digitally and made accessible without charge to the end-user (subject to the terms of an applicable Creative Commons Licence).

OA Publishing Services: the opportunity to publish Articles in OA Journals without paying an APC.

OA publishing process

Corresponding Authors have the opportunity to publish OA Articles in OA Journals without incurring any Article Processing Charges.

In order to publish an OA Article in an OA Journal, the Corresponding Author must:

provide details of his/her affiliation with Licensee, via RightsLink, or other similar publishing management software;

sign a licence to publish form or equivalent documentation, as required by the OA Journal in which the Article is to be published; and select a Creative Commons Licence for their Article.

Corresponding Authors publishing OA Articles in Cambridge OA Journals will typically retain the copyright, granting Cambridge (or its journal proprietors) a licence to publish. Where Corresponding Authors do need to assign the copyright in their Article in order to publish in a particular journal, Cambridge will communicate this in an open and transparent way. Cambridge is actively working towards (a) increasing the proportion of journals that use a licence to publish rather than a copyright transfer and (b) a default cc-by workflow, and will continue to support these objectives by appropriate messaging.

Licensor's Responsibilities

Licensor shall:

verify the identity of Corresponding Authors after the acceptance of Article manuscripts, via affiliation, email domain, or ORCID.

provide Licensee with a list of the OA Journals;

provide reports detailing Licensee's OA publishing output in OA journals, including the following information: name of Corresponding Author, institution article title, DOI, journal title, eISSN, print ISSN, OA licence applied, date first published online, Journal APC and author email; and host information relating to the OA publishing opportunities it offers on Cambridge Core

Send article metadata including OA information to CrossRef

Provide link-resolver vendors and other library systems suppliers quarterly with full details of the licensed material in accordance with the most current KBART standard

(<http://www.uksg.org/kbart/s5/guidelines>); and also with related data of (i) the first and final year, volume, and issue and (ii) the algorithm or syntax for constructing an article-level link from an article's metadata within the licensed material

CUP's publishing reports show, among other things, the number of articles published in total, the number of those that were published OA (and also those published non-OA). Funder data is included where we have this information

The publisher shall inform authors about the availability of institutional agreements which secure the coverage of open access publishing

The publisher confirms that licensed material is archived in Portico

Licensee's responsibilities

Licensee shall inform its researchers and authors about the Licensor's OA publishing process.

4.1 The Parties agree that the Subscription Fee is split into two parts:

A 'Read' fee, for the supply of the Subscription Products; and
